

Programming Fundamentals

Course Instructor Name: Faiza Khadim

Practice tasks

Task 1: (Simple Writing from file)

Write a program which will write the data into a file “sampleoutput.txt” and print it on the screen. The file contains student’s name, student Fee and department name.

Output Screen

Sampleoutput.txt

```
Shourn 50000 IT
Francis 40000 Engineering
Clara 42000 Commerce
Kash 50000 Business
```

Student Name	S. ID	Dept.
Shourn	50000	IT
Francis	40000	Engineering
Clara	42000	Commerce
Kash	50000	Business

Task 2: (Simple Reading from file and Multiple data handling)

Write a program which reads the file sampleIn.txt as given below and display it on the screen.

Output Screen

SampleIn.txt

```
Ahsan Khan, 50000, IT
Alia Shams,60000, Management
Najam ul Saqib,30000,Sales
Ahmer Javed, 50000, HR
```

Employee Name	Salary	Department
Ahsan Khan	50000	IT
Alia Shams	60000	Management
Najam ul Saqib	30000	Sales
Ahmer Javed	50000	HR

Task 3: (Boarder Handling)

Write a program which will read from a file “sampleIn.txt” and print it on the screen. The file contains student’s name, student Fee and department name.

Output Screen

SampleIn.txt

```
Name Fee Dept
Shourn 50000 IT
Francis 40000 Engineering
Clara 42000 Commerce
Kash 50000 Business
```

Student Name	S. ID	Dept.
Shourn	50000	IT
Francis	40000	Engineering
Clara	42000	Commerce
Kash	50000	Business

Task 4:

Write a C++ program in which, asks a **c-string name**, **age** and **c-string contact number** from **user**. Now **insert** this information into a file “**record.txt**” at **start**.

Example:

record.txt [Before]	Input	record.txt [After]
Abdul Basit,19,0300-1234567	Enter Name: Ali Ahmad	Ali Ahmad,20,0333-1234567
	Enter age: 20	Abdul Basit,19,0300-1234567
Qadir Ali,20,0321-1234567	Enter Contact: 0333-1234567	Qadir Ali,20,0321-1234567

Task 5: (Reading through getline())

Write a program which reads the file sampleIn.txt as given below. use getline() function and display it on the screen.

Output Screen

SampleIn.txt

Employee, Salary, Department

Ahsan Khan, 50000, IT
Alia Shams,60000, Management
Najam ul Saqib,30000,Sales
Ahmer Javed, 50000, HR

Employee Name	Salary	Department
Ahsan Khan	50000	IT
Alia Shams	60000	Management
Najam ul Saqib	30000	Sales
Ahmer Javed	50000	HR

Task 6: (Reading and manipulation of data)

Write a program which reads an input file of student’s “samplein.txt”, add the fee of each student by 4000 and write the result in new file “sampleout.txt.”

Samplein.txt

Student Name Fees

Shourn, 50000
Francis, 40000
Clara,42000
Kash,50000

Sampleout.txt

Student Name	Fees
Shourn	54000
Francis	44000
Clara	46000
Kash	54000

Task 7: (Reading through getline() and count records)

Write a program which reads the file sampleIn.txt as given below. use **getline()** function and display it on the screen and **count the number of records** present into the sampleIn.txt.

SampleIn.txt**Employee, Salary, Department**

Ahsan Khan, 50000, IT

Alia Shams, 60000, Management

Najam ul Saqib, 30000, Sales

Ahmer Javed, 50000, HR

Output Screen**Employee Name****Salary****Department**

Ahsan Khan

50000

IT

Alia Shams

60000

Management

Najam ul Saqib

30000

Sales

Ahmer Javed

50000

HR

Task 8: (C string reading)

Write a C++ program in which, **read a c-string sentence** from file **sentence.txt** at once. Your task is to **separate each word** into **another c-string one by one** and **store** them into a file **word.txt**.

Example:

sentence.txt

he is a good boy.

word.txt

he

is

a

good

boy

Task 9:

Write a C++ program in which, read **data** from **“Employee.txt”**. Your program should have many driven solution and user should press ‘Y’ to continue and press ‘N’ for terminate. You have to do the following tasks:

Employee.txt**Employee Salary Department**

Ahsan Khan, 50000, IT

Alia Shams, 60000, Management

Najam ul Saqib, 30000, Sales

Ahmer Javed, 50000, HR

*****Employee System*****

- Press 'S': Add more 5 records in the file with existing file format.
- Press 'P': Print all records on console.
- Press 'E': Find the employee which has max salary on the console.
- Press 'D': Department wise searching.
- Press 'R': Write all the record into another file except the one who is going to leave the department.
- Press 'X' : exit.

Task 10:

Write a C++ program to search the data from the file named "student.txt". Print the name who has greater than 3.2 CGPA.

Name	CGPA
Ali fareed*	3.5
Umar butt*	2.5
Alisbha Afzal*	3.6
Sidra zafar*	1.5

Task 11:

Write a C++ program that reads character by character from **data.txt** , and replace the **character 'y'** with **character 'a'** in a new file (**replace.txt**). Note: we don't know how much data a file has.

data.txt

I live in Lyhore and I wynt to go to ybroyd.

replace.txt

I live in Lahore and I want to go to abroad.
