

Programming Fundamentals

LAB # 1

Course **Instructor Name: Miss Faiza**

LAB Instructor: Qaiser Nadeem

Instructions:

- You have to submit CPP files of the program in a folder, named your Registration Number.
- You have to upload your lab tasks on CMS.
- All program codes should be written in C/C++. Students should use Visual studio compiler for coding.
- Indent and comment your code.
- Use meaningful variable names
- Plan your code carefully on a piece of paper before you implement it.

Learning Objectives:

- Demonstrate knowledge of basic **file handling** in programming C++.
-

Task 1:

Write a C++ program to create a text file named "output.txt" and write the text "Hello, World!" into it.

Output (on Console):

Text written to 'output.txt' successfully!

File Content (output.txt):

Hello, World!

Task 2:

Write a program that asks the user to enter their name and age, then writes this information to a file named "user_data.txt".

Sample Input (User Enters):

Enter your name: Ali

Enter your age: 25

Output (on Console):

User data saved to 'user_data.txt' successfully!

File Content (user_data.txt):

Name: Ali

Age: 25

Task 3:

Write a program that takes three lines of text from the user and saves them into a file called "data.txt".

Output (on Console):

Message written to 'message.txt' successfully!

File Content (message.txt):

Welcome to C++ file handling!

Task 4:

Write a program that adds a new line ("This is a new entry.") to an existing file named "log.txt" without deleting its previous content.

Example Output (File Content Before Running the Program log.txt):

Previous log data.

File Content After Running the Program (log.txt):

Previous log data.

This is a new entry.

Task 5:

Write a C++ program that asks the user to enter their **name and age** and then saves:

- The **name** in a file called "name.txt"
- The **age** in a file called "age.txt"

Example Input (User Enters):

Enter your name: Ali

Enter your age: 25

Example Output (on Console):

Name and age saved successfully!

File Content After Running the Program:

name.txt

Ali

Age.txt

25
